On page 2, line 18, delete "the heating".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 3, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by **Noack (1,948,940)**. **Noack** discloses a steam (vapor) generator and includes a combustion chamber, an outer structure (14) surrounding the combustion chamber wherein a cavity is located between the combustion chamber and the outer structure, a water inlet (13) located in the outer structure and receives water into the cavity, a water conduit (16) coupling the cavity to a water injection element (see element 18) so that water can be introduced into the combustion chamber from the cavity. The combustion chamber and the outer structure constitute the first and second cylindrical element wherein the structures are tapered at each end. The combustion chamber furthermore includes an ignition inlet (24) extending into the combustion chamber, a fuel inlet (23)

for providing fuel to the combustion chamber, an air inlet (which is inherent to cause combustion), and a vapor outlet (32) extending out of the combustion chamber. SEE Figure for clarification of claimed elements.

Allowable Subject Matter

Claims 4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
